How to solve issues with MH Author Box widget

FAQ · https://mhthemes.com/support/knb/how-to-solve-issues-with-mh-author-box-widget/

Why doesn't the author box appear below my posts?

The author box will only appear if the author has added some biographical information in the "About You" box. This gives the author control if he wants to display the author box or not.

Gravatar not working in author box

The image is automatically retrieved from Gravatar, it is associated with the email address you are using for your WordPress site, so please ensure that the email addresses you are using for both your blog and Gravatar are matching.

Display author box without setting up a user

The author box simply displays whichever author has been assigned to a particular post, so you do need to have a user account in the system to do this.

Twitter URL is broken

You need to add the full Twitter URL in the field, not just the username.

==========

Change background color of author box?

Add this to the style.css file of your child theme:

.mh-author-box { background: #fff; }

How to remove the article count in author box?

Add this to your style.css file of your child theme:

.mh-author-box-postcount { display: none; }

How can I completely customize the author box?

Copy the "mh_magazine_post_meta" function from the "/includes/mh-custom-functions.php" file into your child theme's "functions.php" file and modify to suit your needs.

How can I remove the author box avatar completely?

Add this to your child theme style.css file:

```
.mh-author-box-avatar { display: none; }
```

How can I remove the word "Contact:" from the author box?

Add this to your child theme style.css file:

```
.mh-author-contact-title { display: none; }
```
