Where can I download WordPress theme updates?

FAQ · https://mhthemes.com/support/knb/download-theme-updates/

Customers who have purchased Premium WordPress themes by MH Themes have theme updates and support included to benefit from regular updates with improvements and new features. We usually announce theme updates on our Facebook fanpage or you can subscribe to our newsletter to ensure that you don't miss important announcements, special offers, and other great news. Here you can learn more about where you can download theme updates.

Purchased through MH Themes Website

In case you have purchased our WordPress themes through the MH Themes website via our partner FastSpring, you can download the latest version of your WordPress theme directly through your MH Themes account. After you have downloaded the latest version of your theme, you can update your site by replacing the old theme files via FTP.

Purchased through external Marketplaces

Customers who have purchased our WordPress themes through external marketplaces like *Creative Market* or *Mojo Marketplace* can download theme updates directly through their account at the marketplace. But if you have purchased on a marketplace, it is also recommended to register at MH Themes so that you will have easier access to theme support and product updates.

Purchased through WordPress.com

If you have purchased on *WordPress.com* you won't need to download theme updates as your theme will be maintained differently and is not related to our WordPress themes for self-hosted websites. In case you have purchased on *WordPress.com*, but want to use your theme on a self-hosted website, you can purchase the version for self-hosted websites in our shop.
