MH Magazine: Common CSS Customizations

Customizations · https://mhthemes.com/support/knb/mh-magazine-css-customizations/

When you've already configured your magazine WordPress theme and have started publishing awesome content, sometimes there is need for minor customizations that are beyond a standardized options panel and require custom coding. While theme customizations are beyond regular theme support, we have here collected some common CSS customizations for MH Magazine which you can apply to your website and modify these customizations as you like.

How to inspect CSS code on your site?

In order to inspect CSS code on your site, you could have a look at the stylesheet (style.css) of your theme or your browser's inspect tool your browser's inspect tool which you can use to inspect the elements on your site, see how the CSS code has been applied and then use that to make your own customizations. How to apply custom CSS code to your site?

There are several ways of how you can apply custom CSS code to your site. But one thing you really shouldn't do is modifying the original theme files, because these changes will be lost after theme updates. To apply custom CSS code to your site, you either could use the option in your WordPress dashboard under under **Appearance => Customize => Theme Options => Custom CSS**, install a plugin for custom CSS code (e.g. Simple Custom CSS) or make use of a custom child theme.
